# Lion11

Lion11 is a fantasy cricket platform where users can create teams, join contests, and track performance. Features include registration, team creation, live match scoring, player stats, and real-time updates. The admin panel manages users, teams, and contests, ensuring smooth operations. I am handling the admin panel and backend processes, while another person is developing the application in Flutter. The aim is to deliver an engaging and interactive cricket fantasy experience.

Skills and deliverables:- .Net Core, Angular
